
Matt Spear

SUMMARY

Application Developer with exceptional skills in development, reporting and finance. Proficient in multiple programming languages and currently learning more. Great communicator with a driven and focused work ethic.

EXPERIENCE

Upwork / BuiltMighty, Remote - *Lead Developer*

NOVEMBER 2021 - CURRENT

- Develop and maintain web applications. Build applications that streamline and automate processes using Laravel, Vue and SQL.
- Integrate applications with API's to leverage existing technologies.
- Meet with clients to gather specs and develop new features.

Oregon Health & Science University, Remote - *System Application Analyst*

MAY 2020 - OCTOBER 2021

- Use SQL, reports and logs to troubleshoot custom Oracle applications to assist users experiencing issues.
- Work with the technical team to demonstrate current errors and help to identify solutions and improvements. Write documentation for new applications.
- Build ad hoc Cognos reports to help identify areas for improved efficiencies.

Concordia University, Portland - *Application Developer*

JANUARY 2018 - MAY 2020

- Built custom applications to automate procedures and improve workflow. Worked with multiple departments to fine tune requirements and suggest solutions. Reduce the number of clicks/screens a user has to interact with resulting in reduced time needed to complete tasks.
- Built applications with strong frontend and backend validation to ensure ease of use and reduction in errors.
- Used APIs and stored procedures to save, get, and update data across systems.
- Simplify existing reports that are critical for university compliance. Reduced the lines of code while increasing readability. Cut over 3,000 lines to make reports more manageable. At the same time improved the accuracy of the reports.

-
- Respond to tickets and issues in a prompt and polite manner and had a 100% satisfaction rating on all my tickets.

Web Coast Development, Seaside - *Full Stack Developer and Analyst*

JANUARY 2016 - JANUARY 2018

- Designed and built custom web applications and android apps using Laravel, Ionic, and Zend Framework.

Retail Dimensions, Portland - *Contract Developer*

MAY 2015 - NOVEMBER 2015

- Provided customer support in a timely manner for those with issues in Magento and Retail Pro. Identified issues using MySQL and Magento backend. Fixed at source to prevent reoccurring problems.

Financial Friend, Portland - *CTO and Lead Developer*

SEPTEMBER 2014 - APRIL 2015

- Developed application for financial listing website. Lead developer from conception through design phase to completed product.

The Clymb, Portland - *Accountant and Finance Analyst*

SEPTEMBER 2013 - JULY 2014

- improved existing reports using SQL, NetSuite, and Tableau to ensure maximum efficiency in building financial models.
- Built NetSuite reports, helped troubleshoot and fix data issues in NetSuite relating to purchase orders, shipments, and journal entries. Worked closely with NetSuite super user to leverage NetSuite to improve business processes.
- Researched data from multiple databases, tested queries, and provided detailed reports in a clear and organized manner. This work helped cut close time from over one month to three weeks.

Nike Inc, Beaverton - *Allocation Analyst*

OCTOBER 2011 - SEPTEMBER 2012

EDUCATION

University of Oregon, Eugene - *Bachelor of Science in Accounting*

Minor in Environmental Studies

SEPTEMBER 2008 - JUNE 2011
